

2016-2017 CitySmart® Program

We've helped other government institutions save thousands. Your turn.

CitySmart Incentives

Measure Category/Name	\$/kW	\$/kWh
Lighting	Up to \$325	\$0.05
HVAC- Chiller	\$525	\$0.05
HVAC- DX units or Controls	\$350	\$0.05
Refrigeration	\$200	\$0.03
Custom/Other	\$200	\$0.05

**up to 60% of project costs; up to 75% of project costs on non-lighting measures*

The process is simple:

1. Sign the Letter of Intent to enroll your organization in the program.
2. We'll do a pre-installation inspection to document and evaluate your current equipment.
3. You'll receive a report of recommended projects, with payback estimates and preliminary incentive calculations.
4. You and your contractor will complete the project.
5. We'll do a post-installation inspection that documents and evaluates your new equipment.
6. You receive your incentive check.

In government organizations, energy is one of the largest operating expenses. We're here to help you use less.

Join CPS Energy's no-cost CitySmart program. We'll help you identify energy-saving opportunities in your facility and provide services and incentives to help you implement them. The more you save, the more the community benefits.

You could receive:

- **Incentives** toward lighting, HVAC, variable frequency drives (VFDs), and other measures for retrofit and new construction.
- **Technical assistance** to help identify and evaluate the ideal energy-saving opportunities for your organization.
- **Communications support** to publicize your energy efficiency accomplishments and leadership.
- **Energy performance master planning workshops** to familiarize you with best practices in energy management.
- **Energy performance benchmarking** to help you learn where and how your facility is wasting energy.
