

Small business, big savings

Energy is one of the largest operating costs for a small business. Want to use less?

Join our Small Business Program. According to ENERGY STAR®, most businesses could lower energy bills by around 30 percent with a few simple no- or low-cost upgrades. We'll help you do that, with a no-cost energy assessment and incentives toward energy-efficient equipment.

What we offer

Our Small Business Program can lower your facility's energy costs with:

- A no-cost assessment of your facility to identify energy-saving opportunities
- Recommendations on energy efficiency measures
- Estimates on potential savings, project costs and payback periods
- Installation of energy-saving equipment
- Incentives toward energy-efficient equipment and measures

Who is eligible?

Small commercial customers with:

- A valid CPS Energy account number
- 100 kW or less peak demand

A typical project scenario

Typical projects could include everything from LED lighting upgrades and occupancy sensors to anti-sweat heater controls on refrigerator doors. This small office building's lighting retrofit demonstrates the program's potential value, though results can vary.

EXISTING INTERIOR LIGHTING

- 32 4-lamp T12s
- 16 60 W incandescents
- 16 2-lamp T8s

INTERIOR LIGHTING RETROFIT

- 32 2-lamp LEDs
- 16 10 W LEDs
- 16 2-lamp LEDs

Project by the numbers

3.40 kW
total annual energy savings

\$1,870
estimated incentives paid

\$2,010
net cost to customer

\$3,880
total project cost

\$1,221
estimated annual bill savings

20
month payback period
